Plant and Soil **142**: 333–335, 1992.

Contents of Volume 142 1992

Volume 142, No. 1

D. E. Crowley, V. Römheld, H. Marschner and P. J. Szaniszlo, Root-microbial effects on plant iron uptake from siderophores and phytosiderophores 1
F. Schieving, T. L. Pons, M. J. A. Werger and T. Hirose, The vertical distribution of nitrogen and photosynthetic activity at different plant densities in *Carex acutiformis* 9
H. H. Janzen and G. B. Schaalje, Barley response to nitrogen and non-nutritional benefits of legume green manure 19
E. D. Vance and N. M. Nadkarni, Root biomass distribution in a moist tropical montane forest 31
G. Arnold, Soil acidification as caused by the nitrogen uptake pattern of Scots pine (*Pinus sylvestris*) 41
P. S. John, R. K. Pandey, R. J. Buresh and R. Prasad, Nitrogen contribution of cowpea green manure and residue to upland rice 53
M. W. Paschke and J. O. Dawson, The occurrence of *Frankia* in tropical forest soils of Costa Rica 63
S. A. Materechera, A. R. Dexter and A. M. Alston, Formation of aggregates by plant roots in homogenised soils 69
M. H. M. N. Senden, A. J. G. M. van der Meer, J. Limborgh and H. Th. Wolterbeek, Analysis of major tomato xylem organic acids and PITC-derivatives of amino acids by RP-HPLC and UV detection 81
C. F. Hodges, Growth of *Agrostis palustris* in subsurface black-layered sand induced by cyanobacteria and sulfate-reducing bacteria 91
H. W. Polley, H. B. Johnson and H. S. Mayeux, Determination of root biomasses of three species grown in a mixture using stable isotopes of carbon and nitrogen 97
J. A. Toribio and R. Rodríguez-Kábana, The effects of inoculum density and physical factors on the assessment of disease caused by *Sclerotium rolfsii* 107
K. J. Stadt, G. J. Taylor and M. R. T. Dale, Control of relative growth rate by application of the relative addition rate technique to a traditional solution culture system 113
R. J. Haynes and P. H. Williams, Long-term effect of superphosphate on accumulation of soil phosphorus and exchangeable cations on a grazed, irrigated pasture site 123
F. Palmason, S. K. A. Danso and G. Hardarson, Nitrogen accumulation in sole and mixed stands of sweet-blue lupin (*Lupinus angustifolius* L.), ryegrass and oats 135

Short communications

S. G. Sommer and B. T. Christensen, Ammonia volatilization after injection of anhydrous ammonia into arable soils of different moisture levels 143
M. G. Dosskey, R. G. Linderman and L. Boersma, Comparison of biomass allocation in ectomycorrhizal and nonmycorrhizal Douglas fir seedlings of similar nutrition and overall size 147
B. Zur, J. D. Hesketh and J. F. Reid, Temperature effects on nodal root development in maize 151

Volume 142, No. 2

P. J. Polglase and P. M. Attiwill, Nitrogen and phosphorus cycling in relation to stand age of *Eucalyptus regnans* F. Muell. I. Return from plant to soil in litterfall 157
P. J. Polglase, P. M. Attiwill and M. A. Adams, Nitrogen and phosphorus cycling in relation to stand age of *Eucalyptus regnans* F. Muell. II. N mineralization and nitrification 167
P. J. Polglase, P. M. Attiwill and M. A. Adams, Nitrogen and phosphorus cycling in relation to stand age of *Eucalyptus regnans* F. Muell. III. Labile inorganic and organic P, phosphatase activity and P availability 177
J. Cavelier, Fine-root biomass and soil properties in a semideciduous and a lower montane rain forest in Panama 187
R. Pinton, Z. Varanini, G. Vizzotto and A. Maggioni, Soil humic substances affect transport properties of tonoplast vesicles isolated form oat roots 203
P. Högberg, C.-O. Tamm and M. Högberg, Variations in ^{15}N abundance in a forest fertilization trial: Critical loads of N, N saturation, contamination and effects of revitalization fertilization 211
I. G. Burns, Influence of plant nutrient concentration on growth rate: Use of a nutrient interruption technique to determine critical concentrations of N, P and K in young plants 221
T. W. Speir, J. A. August and C. W. Feltham, Assessment of the feasibility of using CCA (copper, chromium and arsenic) – treated and boric acid – treated sawdust as soil amendments. I. Plant growth and element uptake 235
T. W. Speir, D. J. Ross, C. W. Feltham, V. A. Orchard and G. W. Yeates, Assessment of the feasibility of using CCA (copper, chromium and arsenic) – treated and boric acid – treated sawdust as soil amendments. II. Soil biochemical and biological properties 249
H.-R. Schulten and R. Hempfling, Influence of agricultural soil management on humus composition and dynamics: Classical and modern analytical techniques 259
R. Brumme, U. Leimcke and E. Matzner, Interception and uptake of NH_4 and NO_3 from wet deposition by above-ground parts of young beech (*Fagus silvatica* L.) trees 273
M. P. Tofinga and R. W. Snaydon, The root activity of cereals and peas when grown in pure stands and mixtures 281
F. Bertelsen and E. S. Jensen, Gaseous nitrogen losses from field plots grown with pea (*Pisum sativum* L.) or spring barley (*Hordeum vulgare* L.) estimated by ^{15}N mass balance and acetylene inhibition techniques 287
B. Ball-Coelho, E. V. S. B. Sampaio, H. Tiessen and J. W. B. Stewart, Root dynamics in plant and ratoon crops of sugar cane 297
K. D. Smiciklas and F. E. Below, Role of cytokinin in enhanced productivity of maize supplied with NH_4^+ and NO_3^- 307
J. Yang, P. R. Verma and G. L. Lees, The role of cuticle and epidermal cell wall in resistance of rapeseed and mustard to *Rhizoctonia solani* 315

Short communication

C. Boonne, J. P. Wacquant and R. Jonard, In vitro cloning of *Dittrichia viscosa* for screening nutritional ecotypes 323
